

Certified Naturally Grown

The grassroots alternative to USDA Organic

On Certified Naturally Grown farms you'll find...

- Organic methods that protect our health and environment
- Delicious food grown in living, nourishing soil
- Livestock enjoying pasture and natural living conditions

You won't find...

- Synthetic chemical insecticides, herbicides or fertilizers
- Chemically treated or genetically modified seeds
- Growth hormones or antibiotic-laced feed

Certified Naturally Grown is...

- For people who want food that's grown locally *and* organically
- A non-profit grassroots organization *not* affiliated with any government agency
- A certification program using standards based on the National Organic Program
